Summary

Year 13 student and full stack developer with experience building full stack web applications using Next.js, React, TypeScript, and Supabase. Currently exploring application security and seeking a cyber security apprenticeship where I can contribute while continuing to develop my technical skills.

Skills

Languages: TypeScript, JavaScript, HTML5, CSS3 | Frontend: Next.js, React, Tailwind CSS | Backend: Node.js | Database and auth: PostgreSQL, Supabase | Deployment & Tools: Vercel, Git, GitHub

Projects

CathoScroll

Catholic learning platform featuring user authentication, public profiles, comments, bookmarks, progress tracking, search, and category-based content discovery.

Technologies: Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Vercel

- Designed and developed a full stack web application from concept to deployment.

- Implemented authentication, user profiles, comments, bookmarks, and progress tracking.

- Built search, categories, metadata, sitemap generation, and SEO improvements.

Personal Portfolio

Portfolio website used to showcase projects, blog posts, and technical interests.

Technologies: Next.js, React, TypeScript, Tailwind CSS, GitHub API, Vercel

- Integrated the GitHub API to display repository information automatically.
